

This page shows some countries and the number of ipv4 and ipv6 NTP servers they have in the NTP pool.

Sorted by ipv4 servers per million people and last updated: 2026-09-21

| Country            | Population - Million | Active Ipv4 Servers | Active Ipv6 Servers | Ipv4 servers per million people | Ipv6 servers per million people |  |
|--------------------|----------------------|---------------------|---------------------|---------------------------------|---------------------------------|--|
| China              | 1404                 | 37                  | 45                  | 0.03                            | 0.03                            |  |
| India              | 1429                 | 39                  | 30                  | 0.03                            | 0.02                            |  |
